The dream of founding **Bodegas Centro Españolas**, the first winery Chateau style in Castile-La Mancha, came true in 1991 when three families combined the most advanced technology and local traditions. Focused on exportation, the Allozo wines are now present in more than 30 countries all over the world.

The Allozo project is based on the intensive work in specially selected vineyards, carried out by our vine growers and oenologists to extract the essence from the different varieties and terroirs. The whole process of production and bottling takes place in our installations to give rise to Young, Crianza, Reserva and Gran Reserva wines that will age in our 3800 oak barrels to obtain the appropriate maturity, and then finish their evolution in our wine racks where they will reach the characteristic balance of Great Wines.

Many awards support our Allozo wines, first in Castile-La Mancha to win the Gold Medal at the Challenge International du Vin in Bourdeaux and the National Championship in Ljubljana 2006, the world's longest wine contest. These and many other recognitions make Bodegas Centro Españolas and Allozo wines the most laureate in Castile-La Mancha.

What is special in our winery? We are a family-owned winery and vineyards, pioneers in author wines and wine tourism in CLM, most awarded winery from our region. Always looking for the quality working from the vine to your glass since 1991.
