Founded and owned by the Fernandez family, "Finca Fabian" estate currently includes over 200 hectares of vineyards. At Punctum, the estate grown grapes are turned into world class organic and biodynamic wines according to the tradition handed over for centuries in Spain and by the modern means of a sustainable agriculture and winemaking.

In the province of Cuenca near central Spain, the vineyard is located in an area where wine culture has been around for decades. It sits in an altitude of 800 meters above sea level. The continental Mediterranean climate of this territory brings plenty of sunlight to the vineyard, and the clay soil retains water, essential for the health of the vines.

We take part of a farming philosophy that is aiming towards the future: we understand how to manage nature to deliver top quality grapes and wines while taking care of the environment, by improving it instead of spoiling it.

Our wines are organic, biodynamic and vegan-friendly, following our commitment to the environment and wine lovers around the world.

What is special in our winery? Punctum is committed to deliver unique, value added products. We aim to achieve this through organic and biodynamic agriculture, making wine that stands out not only for the beauty of its aroma or delicacy on the palate, but for being natural and authentic and free of any chemicals.
